

Information Builders enables agile information solutions with business intelligence (BI) and integration technologies. Flexible, scalable, and secure, WebFOCUS – the most widely utilized BI platform – permeates every level of the extended enterprise through a simple and intuitive user experience.

WebFOCUS Reporting Factory

Information Builders has more than 30 years of experience in the business intelligence (BI) field, specializing in wide-scale delivery of real-time information. Our agile, premier BI platform, WebFOCUS, connects to any enterprise system or application and enables simple and intuitive interaction with information. We can help organizations make the most of their investment in WebFOCUS.

Information Builders WebFOCUS Reporting Factory provides high-quality and lower cost report development to help you deploy BI across your organization. By combining onshore and offshore WebFOCUS-certified resources, Information Builders enables organizations to deploy many more reports within their budget – and WebFOCUS Reporting Factory ensures the lower cost of offshore development and greatest return on investment.

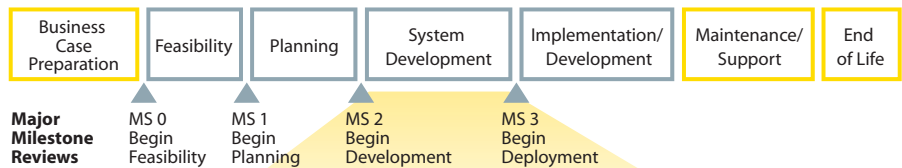

Meeting Business Needs Effectively

WebFOCUS Reporting Factory is based on Information Builders expertise in managing and delivering WebFOCUS reporting systems to enhance business processes. It employs Information Builders project management guidelines and systems development methodology to ensure all business requirements are addressed and that WebFOCUS is fully leveraged.

WebFOCUS-certified offshore resources significantly lower your cost per report. Information Builders trains and qualifies offshore resources in WebFOCUS. In addition, the offshore resources work matching business hours with the onshore project team to expedite the development process.

To provide high-quality services and reduced cost, Information Builders employs its onshore WebFOCUS resources to work side by side with an organization's subject matter experts to finalize the reporting requirements and specifications. The onshore Information Builders resources develop reusable/common utility procedures and reporting templates to expedite offshore development and ensure reports have the same look and feel. The Information Builders offshore WebFOCUS resources develop and unit test reports. Since the offshore resources work matching business hours, there are no delays or lost time due to different time zones.

During development and testing, communication is ongoing between onshore and offshore resources. All resources have instant access to each other via e-mail and telephone. Live meetings or video conferencing are also available if needed. Daily status updates ensure the reports are completed within the planned timeframe. Onshore resources then test the completed reports to confirm the reports satisfy all requirements.

Summary of Benefits

- Reduced development cost with high-quality results
- Increased WebFOCUS report production within your project funding
- Improved return on investment
- Increased satisfaction with robust BI applications
