

Information Builders is one of the largest independent software companies in the world. We work with over 11,000 customers to ensure their success by putting interactive and actionable information in the hands of everyone in the extended enterprise: employees, partners, suppliers, and customers.

Facilities Management

for Healthcare Organizations

The Facilities Management Reporting Foundation provides you with valuable information to help you better manage your relationships with insurers.

Enhancing Services by Sharing Information

The healthcare industry faces mounting pressure to deliver low-cost, high-quality care in order to keep both patients and insurers satisfied while maintaining profitability. To identify ways to enhance services and lower expenses, healthcare professionals must be able to easily obtain a complete, accurate picture of their business by consolidating and analyzing financial and clinical information. To help them achieve this goal, Information Builders offers the Facilities Management Reporting Foundation, a solution designed to provide the critical intelligence needed to improve quality of care and reduce overall operating costs.

Tailored to Meet the Unique Needs of the Healthcare Industry

The Facilities Management Reporting Foundation, part of Information Builders' family of Vertical Business Reporting Templates, is built upon our report template technology and WebFOCUS business intelligence solution. Each Foundation includes multiple report templates that provide the building blocks for creating a comprehensive reporting environment and have been created for standard business functions such as metrics deviations, trending, ranking, variance, dependency analysis, and business segmentation. Corresponding data is applied to the templates at a later time. As a result, we can quickly and cost-effectively deliver a complete end-user reporting environment tailored to meet healthcare-specific information needs.

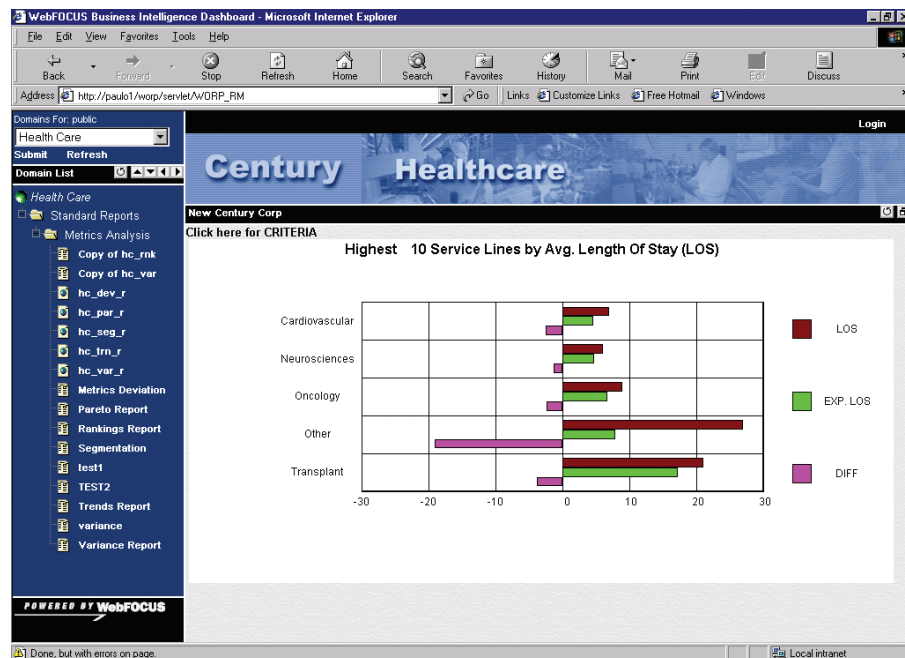

Information Builders' Vertical Business Reporting Templates enable companies to deliver a dynamic business discovery environment in about half the time it would take to implement a packaged application or build one with other business intelligence tools.

Key Business Metrics to Enhance Facilities Management

The Facilities Management Reporting Foundation allows healthcare professionals at all levels to easily analyze critical information and track key performance indicators.

- Monitor crucial financial metrics such as revenues and costs, and easily identify your most and least profitable services.
- Stay on top of important service-related trends such as length of stay by diagnosis-related group (DRG).
- Manage relationships with insurers by understanding your payer mix and tracking payment histories.
- Assess physician performance by analyzing average length of stay, revenues, and costs by doctor code.

With the Facilities Management Reporting Foundation, you can track critical trends such as average length of stay.

Accelerated Deployment With Implementation Services Packages

Information Builders' Implementation Service Packages offer a complete and cost-effective solution designed to guarantee optimum performance and accelerate deployment of the Vertical Business Reporting Foundations. Our consultants will work very closely with you to gain an in-depth understanding of your needs and issues, and ensure delivery of a solution that will best address them.

Find Out More

To find out how our solutions can help your company succeed, talk to an Information Builders representative today. Contact your local Information Builders office, visit us at www.informationbuilders.com, or in the U.S. and Canada, call **(800) 969-INFO**.

Available packages include:

- **End-User Reporting Package**

Delivers a complete end-user reporting environment – designed, built, and implemented – in just 45 days. Select from the available vertical reporting templates and create customized templates that address your unique needs. The resulting reports can be available for real-time analysis, as well as scheduled or alert-based delivery.

- **Business Intelligence Data Mart**

Includes everything you need to get your data mart up and running – in just 35 days. Our highly skilled consultants will design, build, and implement your data mart and provide your technical team with the documentation, experience, and knowledge they need to maintain it.
