

Information Builders is one of the largest independent software companies in the world. We work with over 12,000 customers to ensure their success by putting interactive and actionable information in the hands of everyone in the extended enterprise: employees, partners, suppliers, and customers.

WebFOCUS for PeopleSoft can access virtually any information source and deliver it in a variety of formatted reports to browsers, wireless devices, and e-mail addresses.

### Sophisticated Enterprise-Level Business Intelligence

To make strategic decisions quickly, organizations require the ability to conduct sophisticated enterprise-level analysis from real-time information, a capability beyond the reach of most standard reporting applications. As a result, users of ERP packages such as PeopleSoft often find the need to augment their capabilities in order to effectively deploy business intelligence across their enterprise. To help companies meet the challenge, Information Builders offers WebFOCUS for PeopleSoft, a flexible and scalable PeopleSoft-certified reporting solution that provides access to up-to-the-minute information and a clear window into your business operations.

### A Powerful Solution for All Your PeopleSoft Intelligence Needs

WebFOCUS empowers users to easily generate the most complex reports from data in PeopleSoft, as well as more than 85 other information sources. Features include:

- Support for various formats – HTML, Adobe PDF, XML, spreadsheets, and more
- Web and client/server support for all PeopleSoft functionality
- Integrated security (both Query and Row level)
- Support for technical power users and nontechnical functional end users via a single user interface
- The ability to report on data in multiple PeopleSoft modules, as well as on non-PeopleSoft legacy data, in a single pass
- Powerful integration with Microsoft business tools such as Excel 2000
- A single solution for handling the functionality of all PeopleSoft-delivered reporting tools
- Automated report distribution and subscription reporting for scheduling and automatically distributing reports via e-mail and handheld devices such as PalmPilots
- Sophisticated query governing for optimizing systems usage and costs

## Find Out More

To learn how WebFOCUS for PeopleSoft can help your company succeed, talk to an Information Builders representative today. Contact your local Information Builders office, visit us at [www.informationbuilders.com](http://www.informationbuilders.com), or in the U.S. and Canada, call (800) 969-INFO.

### Management Control and Security

WebFOCUS for PeopleSoft's Managed Reporting Environment (MRE) allows administrators to maintain centralized control over reports and sensitive data while simplifying reporting for users. The point-and-click GUI-based environment enables users to execute predefined reports, change parameters in existing reports, or create and save new reports. Users work within predefined domains, which can be dynamically modified by MRE Administrators. These domains can be organized to reflect the user's responsibilities and skill level.

### Extensive Reporting Capabilities

The powerful WebFOCUS for PeopleSoft 4GL supports a wide range of reporting capabilities, including:

- The ability to create custom, complex, and parameterized reports, or ad hoc queries
- An OLAP viewer that provides most of the commonly used OLAP functions without the need to build and maintain a cube
- Matrix (spreadsheet) layout reporting
- Printing and summing of fields with headers, footers, control breaks, etc.
- Read and record limit controls during report development
- Conditional styling based on specified data conditions/values

### Comprehensive Support and Service

To ensure rapid deployment, Information Builders provides comprehensive installation, training, and consulting services for WebFOCUS for PeopleSoft. Our highly skilled specialists will help you implement and configure your solution for optimum performance.

### Certified for PeopleSoft EPM 8

WebFOCUS for PeopleSoft has been certified for Release 8 of Enterprise Performance Management (EPM). This means our solution provides enhanced production and analysis capabilities, empowering all levels of users to access data in EPM – plus other PeopleSoft applications such as HRMS and Financials, and more than 85 additional sources – and turn it into valuable business insight.

The certification program allows PeopleSoft to leverage value-added solutions of selected e-business intelligence partners who meet or exceed the requirements for delivering analytic content over the Web.
