

iWay Software enables online, real-time, and batch integration of information assets, internal business processes, and external business partners all from a single platform.

iWay Intelligent Adapter for Khalix

The iWay intelligent Khalix Adapter assures complete integration with any other database or packaged application.

- **Create, analyze, and assess** business rules and what-if scenarios within your planning process to help drive your strategic goals
- **Integrate all data, business rules,** and key drivers into a single repository of accurate information that can be accessed easily by all employees involved in the process
- **Foster a unified, consistent view** of plans, budgets, and forecasts, empowering debates on business decisions rather than data accuracy

Accelerating Performance Management Integration

iWay Software is the world's leading provider of integration tools and adapter technologies that deliver fluid, natural control over all of your enterprise information assets. Over 2,000 customers use our broad set of standards-based adapters to rapidly integrate their applications, e-business documents, and databases into a single virtual information system with shared data structures, transactions, and business logic. No matter how diverse or dissimilar the components of your IT infrastructure may be, iWay integration tools and adapters make them all accessible for e-business applications and integration projects.

Longview Solution's Khalix™ is a corporate performance management (CPM) suite, delivering a single, enterprise-wide, repository of financial and non-financial data. From this single application, Khalix helps organizations consolidate, budget, forecast, plan, model, analyze, close their books, and manage their corporate tax requirements with speed and financial accuracy.

The iWay Intelligent Adapter for Khalix incorporates in-depth knowledge of its business objects, metadata, event interfaces, and APIs to optimize the integration of Longview's CPM solution within enterprise business processes.

iWay integrates virtually any other legacy system, DBMS, ERP, SCM, or CRM application into Khalix to allow for complete performance management planning, budgeting, forecasting, and tax. iWay adapters eliminate the need to write and maintain point-to-point interfaces between Khalix and non-Khalix application systems to reflect an integrated business event. The iWay Intelligent Adapter for Khalix protects your investment in legacy databases, ERP, CRM, SCM, and homegrown legacy applications modules.

Product Details

Key features of the iWay Intelligent Adapter for Khalix include:

- Support for synchronous and asynchronous bidirectional interactions between all iWay-supported intelligent adapters and Khalix
- Ability to extend packaged and e-business applications systems based on Java™, XML, SOAP, and Web services without requiring any custom coding
- Common development environment integrated inside multiple message brokers and application servers
- Uniform XML interface for all packaged applications, reducing the requirement for specific packaged applications' native API knowledge
- Bidirectional adapter functionality to automate integrated event-driven input capability to integrate real-time transactions
- Document conversion from proprietary XML to standard XML, EDI formats, SQL, and RPCs to other application systems

Corporate Performance Management That Truly Performs

Visibility and transparency of an enterprise's performance indicators are integral to the success of public and private sector organizations. Everyone must be on the same page, speaking the same language with a common understanding of the pain points and options available.

iWay Software and Longview Solutions solve the challenges associated with achieving the speed, visibility, and financial integrity essential for an effective enterprise. iWay software integrates silos of data, countless spreadsheets, and disparate databases and applications like ERP. Khalix validates the information, performs currency translation and intercompany allocations, executes both the actual and tax close, and applies consistent budgeting, planning, forecasting and what-if scenario modeling. By combining the Information Builders dashboard with Khalix and iWay Software's adapter, accurate information, both financial and non-financial, is made available enterprise-wide in a true, secure, and easy-to-use format with transparency and consistent controls. Together, iWay Software and Longview Solutions corporate performance management software will allow your organization to outperform expectations.
